OBITUARY

Mrs. H. E. G. H. Schofield
Mrs. Little Louise Schofield, beloved wife of H.E.G.H. Schofield late of this community passed away at the family residence, Edmonton on Friday last September 28th at the age of 67 years.

Born at Cambridge, England, Mrs. Schofield came West as a bride in 1906, taking up residence on the farm east of town. Mr. and Mrs. Schofield left in 1932 to reside in Edmonton.

During her life time Mrs. Schofield made many friends, and was a woman of the highest type. Taking an active part in all U.F.W.A. affairs, Mrs. Schofield was at one time on the board of Directors, for the East and West Calgary division of the Provincial body.

She leaves to mourn her passing, her husband, one son H. J. Schofield of Crossfield, a brother W. Hayes of Olds, four sisters and one other brother in England.

Funeral services were held in Edmonton at the Foster & McGarvey funeral parlors, Monday at 3.30 conducted by Rev. Canon E. Pierce Goulding, and the remains shipped to Crossfield.

Services were held in Crossfield on Tuesday at 3 p.m. from the Church of the Ascension, conducted by the Rev. A. D. Currie, and interment took place in the local cemetery. Pall-bearers were, G. A. C. Dougan, Wm. Laut, Ivor Lewis, J. P. Metheral, C. C. Stafford, and O. E. Jones.

Representing the Calgary office of the United Farmers, were N. Priestly, Miss Birch, and Miss Malloy.

Many beautiful floral tributes banked the casket.

The sympathy of the entire district is extended to Mr. Schofield Senior and Junior, at this time.

Monthly Meeting Board of Trade

The monthly meeting of the Board of Trade was held Monday evening in the lower Masonic Hall, with Dr. G. W. Kerby, of Mount Royal College, Calgary as guest speaker. It was indeed unfortunate that only a very sparse attendance greeted so prominent a lecturer as Dr. Kerby.

Taking as his subject "Canadian Heritage" Dr. Kerby led his listeners step by step down through the various "eras" of Canadian history.

At the conclusion of his address, one felt that it was indeed a proud privilege to be a Canadian.

Throughout his discourse Dr. Kerby demonstrated fully that he had control of his subject, and he intermingled and interwove many a humorous thought, and story.

The chief business of the evening was R. M. McCool's report of the "Sports Day" and he reported a small profit on the day's celebration.

Mrs. P. F. Fleming and her two sons Jack and George, supplied the music for the opening and closing of the meeting, and President Collicutt presided.

A vote of thanks was tendered the speaker and artists.

While no doubt the re-commencement of threshing kept many country folks away, it surely was possible for a greater showing from the town members.

The report of the D. M. Duggan meeting held here on Tuesday night has been held over until next week owing to lack of space.

Messrs R. D. Sutherland and T. Bartholomew, attended the Red Chevron Association (1914 Remnants) Re-Union at Calgary on Wednesday evening last.

Dr. Whillans made a professional visit in the vicinity of the Little Red Deer on Sunday. He reports the roads in very bad condition, in fact they are damn bad.

BORN—To Mr. and Mrs. Chas. Midland on Sept. 27, 1934, a son at Mrs. Collins Nursing Home.

Inter-School Track Meet Friday

All arrangements are complete for the holding of the Inter-School Athletic Meet here tomorrow. 80 events are on the programme which starts promptly at 10.30 a.m. and continues until 5 p.m.

Innisfail, Bowden, Olds, Didsbury, Carstairs and Crossfield are the competing schools.

The following will be the Crossfield track team.
Senior (A)—Ralph McFadyen, James McClelland, Kathleen Fitzpatrick, Betty Bennie, Verna Pogue.
Senior (B)—Arthur Baker, Vinton Frisk, Frank Murdoch, Harold Mair, Anne Cameron, Cora Hall.

Intermediate (A)—Gavin Goldie, Lorne Sharpe, John Carmichael, Kenneth Miller, Sylvia Southwood, Irene Walker, Margaret Cameron.

Intermediate (B)—Earl Hopper, Jack Fleming, Eddie Gittel, Jack Williams, Hilda Gittel, Arlene Amery, Jean Carmichael.
Juniors—Allan Sharp, Ross Gibson, Chas. Russell, Warren Hall, George Fleming, Clark McMillan, Violet Currie, Norma Fleming, Vida McMillan.

Another Old Landmark Goes

The old hay shed in the north end of town was torn down last week by McCaskill Bros. and hauled to Mr. Collicutt's ranch.

To many this was just an old building but to some it was a historic landmark which played an important part in the lives of many of Crossfield's citizens, past, present and future.

One half of this building was Crossfield's first school built in 1903 on the property where Mr. R. B. James now lives. The village grew so rapidly that more school room space and ground space was needed and in 1907 Mr. John Becker was awarded a contract to move the school to the present site and erect an addition to the end making it a two room school. Mr. John Mason had a sub-contract to build the addition.

In 1908 the town was still suffering from growing pains, a third room having been opened over the old Drug Store facing north on Hammond Street and situated on the back end of the present bank property.

In 1909 the school board decided to build the present brick school and Mr. George Becker got the contract which was completed in 1910. Mr. Becker moved the old school with its addition down to the corner where Lawrence Nichol now lives and the school house became a dairy barn. Later it was moved to the lot just north of that corner and has been used as a storage shed ever since.

We are informed that the first school board was the late Jas. McCool, chairman, the late Henry E. Marston, and H. B. Armstrong. John S. Pines was the sec-treas. The first teacher was Miss Mallory who later married John (Jack) Grazier who originally lived with his parents on the Claude Deeks farm.

The old drug store was moved to Nanton Street and after considerable changes it is now the home of Mayor J. M. Williams.

A lot of real interesting stories could be told about the "Little Old School House" if we had space. To some who watched the operations last week we realize the hurt that entered their heart. True they tear down buildings every day, but this was different—this was their school. We heard one talking of the good old times that were had, concerts, Christmas trees, spelling matches, yes, and even flirts. Where characters were moulded, friendships started that developed into life companionship or perhaps drifted apart never to meet again, leaving only the great memory. As we watched their faces and read their thoughts the following words came to us.

"Recollections-to be are the realities of now. Do homage to them! Take all that they have to give, and give them your best. For some day, you will be remembering."

A New And Better Viewpoint

The recent annual convention of the Canadian Chambers of Commerce held at Winnipeg, was, it is generally recognized, one of the most important and in many respects the most significant gathering yet held by that body. It was not only one of the largest assemblages of outstanding men in the financial, industrial and commercial life of the Dominion yet convened, but it appears to have been animated by a new spirit based upon a fuller recognition of the responsibilities of what has been termed Big Business to the country as a whole and to the masses of producers, workers and consumers who, in the last analysis, are the backbone of the nation.

Important resolutions dealing with matters of far-reaching social and economic questions, and involving vital changes in national policies, were adopted, not the least significant of which was the declaration in favor of the negotiations of a Reciprocity Agreement with the United States in matters of trade. The adoption of this resolution in itself reveals the change in attitude and viewpoint of the business world of Canada.

Significant, too, were some of the addresses delivered by men occupying high executive positions in the industrial world. For example, Mr. T. A. Russell, president of the Massey-Harris Co., told the convention that "the success of industry and farming were wrapped up together in Canada in a way which nothing could separate," and he gave facts and figures to prove it. As the purchasing power of the farmer declined, said Mr. Russell, so did the demand and output for farm implements. In the case of the Massey-Harris Co., he said, employment dropped from 4,900 in 1929 to an average of less than 1,200 for the years 1931, 1932 and 1933. "Not only has this proved a hardship for the men thrown out of employment through no fault of their own," he said, "but it has tremendously affected their purchasing power, their ability to pay for the products of the factory, and thus to Canadian prosperity. Likewise, the investor who has had no return on his investment has had to curtail his expenditures and has been a poor customer either for the farmer or for industry." Mr. Russell strongly urged the absolute necessity of complete and generous co-operation with the farming industry in order to bring about its re-establishment and promote its prosperity.

Then, up spoke Mr. W. R. Campbell, president of the Ford Motor Co. of Canada, on behalf of all workers in industry. Space will not admit of any extended quotations from Mr. Campbell's address, but a few will suffice to indicate his position, and the attitude he urged all employers of labor to adopt in the interests of the workers, in their own interests, and in the interests of the country at large.

"As far as Canada is concerned there can be no normal times until all of our people who are capable of working have an opportunity for gainful employment—free and unfettered by government aid. In dealing with the ills which must be corrected it is time that the very grave importance of our human relationships be recognized. I repeat—until every man in this country capable of working is able to find gainful employment, the prime responsibility of industry is to the worker. The employer's interest must not be subordinated to the interest of the shareholder.

"Perhaps," continued Mr. Campbell, "these are rather amazing statements, but not until this condition is brought about can either capital and management or the worker prosper. Our prime duty, then, should be to make certain not only that the interest of labor in the benefits of industry be not subordinated to that of capital, but also that labor be granted an equitable share of these benefits."

Suggesting the only possible way in which industry can be re-vitalized and employment provided, Mr. Campbell said: "What we must do is to start the ball rolling upward injecting more money into our economic structure at the bottom, through the wages of these industrial workers and profit by the steadily increasing circulation of this money upward through our whole business fabric. That is good business because it is profitable. Perhaps it means even the salvation of our industry itself as we know it today. Our problem at home, then, becomes one of finding greater markets for the products of domestic manufacture, and this again involves upon the problem of finding greater employment and providing increased purchasing power for our own workers. By increasing the earnings of the average worker, by paying him a greater return for his labor and by increasing the volume of his employment, by pumping into our economic structure more money at this base, we can get a start toward solution of our problem."

Having made a reference to the further development of export trade, Mr. Campbell concluded: "It is an inescapable fact that we have now entered upon an era of social readjustment in this world. In working out this readjustment so that the rights of both capital and labor shall be properly balanced, it devolves upon capital to take the initiative, with the welfare of the whole nation always in mind. Capital must do this, because capital has the imagination, the training and the ability to assume leadership. Until this proper balance is struck and until this country has been able to lift itself by its own courage and its own ability back to normal times, it is imperative that capital defer profits, defer its claim to a return upon invested wealth, in order to provide all of our people able to work with adequate employment at such a return as to enable them to live in accordance with standards commensurate with the calibre of Anglo-Saxon peoples."

Thus we have open confession by two of Canada's great industrialists that their first responsibility to-day is not to shareholders and bondholders, but to farmers and workers—the real primary producers; that capital must wait for its return; hence, that it must take the leadership in solving the problems of the producers, workers and consumers, in full realization of the fact that unless and until these are solved, there can be no return and no future for industry or the enormous investments that have been made in industry. Such frank albeit belated recognition of this great truth is, in itself, the first and a long step towards ultimate advancement and success for all.

Him: "I hope you'll dance with me tonight."
Her: "Oh, certainly. I hope you don't think I came down here merely for pleasure."

Stately Wedding

Prince of Wales Expected To Be Best Man At Marriage Of Prince George And Princess Marina
The world's best-known bachelor, the Prince of Wales, is expected to be the best man at the stately wedding in Westminster Abbey of Prince George and Princess Marina of Greece. The date was announced as Nov. 29.

Little Princess Elizabeth, niece of George, will be a bridesmaid. The date was chosen after long discussions at Balmoral castle, Scotland, in which the king and queen, Marina's parents, Prince and Princess Nicolas of Greece, the Archbishop of Canterbury and the betrothed couple themselves participated.

It was expected the service would be performed by the Archbishops of Canterbury and York. The great ceremony in the abbey will be followed by a short service according to the rites of the Greek Orthodox church, in a room in Buckingham palace.

The Majesties will drive to the abbey in full state. Prince George will drive separately with the Prince of Wales, while Marina will be in a third procession with her parents.

LOST TO LBS. IN TWO MONTHS

Not too Old to Reduce at 50

Here is a letter which proves that there is no necessity to tolerate excessive fatness, even at the age of 50:—

"I was becoming too fat after reaching 50. I had attacks of rheumatism and indigestion. I took ordinary salts and other medicines, but they did not do any permanent good. Then I commenced taking Kruschen. I soon began to feel different—brighter, stronger, had more energy, no rheumatism, and to my surprise, after two months I lost 10 lbs. in weight, although was eating much more, as digestion fulfilled many more left me."—W. H. G.
The numerous vital salts in Kruschen stimulate and tune up the bodily functions from a number of different angles—Yours stomach, liver, and kidneys all feel the immediate benefit. Your blood is cleansed of impurities and becomes invigorated and refreshed. You forget indigestion, rheumatism, and depression in a new and unimagined feeling of physical and mental exhilaration.

Vancouver Is Likened

To Constantinople

Should Greatly Aid Modern World States Lord Tomlin

Vancouver, with its natural advantages and geographical position, should be to the modern world what Constantinople was to the ancient world, Lord Tomlin of Ash, member of the judicial committee of the privy council, declared in an address to the Canadian Club at Vancouver.

Lord Tomlin said that Vancouver with its marvelous harbor and a network of railways behind it should be vastly interested in the solution of the world depression. Because, he said, Vancouver should logically hold Asia commercially in fee.

Ancient Wheat

Try To Germinate Seeds 2,500 Years Old

The question of whether wheat reputedly 2,500 years old will sprout was before scientists of the agriculture ministry, and Oxford and Cambridge Universities recently. The wheat seed was found in a tomb of an Egyptian king at ancient Thebes. Experts are attempting to produce germination by natural means, failing which they intended to try artificial methods.

How are Your Nerves?

Mr. R. Walden of Hamilton, Ont., said: "I was tired and nervous, and had headaches, but the 'Fowler's' remedy cured me. I feel like a new man. This tonic strengthened me greatly." Dr. R. Walden, Hamilton, N.Y., for free medical advice.

System Not Sound

The Dominion department of agriculture announces that experiments have shown that the practice of top-dressing turnips some weeks before the date of harvesting is not sound. Data obtained shows that the turnips from the untopped crops had the higher food value. The topped crop failed to grow after topping and gave a lower yield per acre of nutriment.

More than 1,500 families have been rendered in China since 1890 B.C. because of 1877-78 claimed 9,500,000 lives.

WHAT DOES YOUR HANDWRITING REVEAL?

By LAWRENCE HIBBERT
(Grapho-Analyst)
(All Rights Reserved)

(Editor's Note: The response to the author's invitation to readers to send in a specimen of their handwriting for a personal reading has been enormous. Readers are referred to the announcement at the foot of this article.)

"How can Grapho-Analysts help me?—that is the question that readers invariably ask when they read my articles on the subject of character analysis from handwriting."

And it is a natural question. For in these days, perhaps more than any others, the struggle for existence, for progress is individualistic. I will endeavour to answer the question by first asking others.

Are you happy?—or are you continually frowning at life, with a constant suspicion of your shoulders?

Are you progressing in your work?—or are you dissatisfied; a square pin in a round hole; unable to make any real progress, yet not knowing what to do to change the possibilities of your future?

If you are married, are you contented?—or is disquiet creeping into your life?—or are you living the life of an involuntary recluse, unable to enjoy the society and companionship of your friends?

The answers to all these questions can be summed up in a phrase—*Know yourself*. And, one word will suffice—*Understanding*. If you go through life without knowing and understanding yourself—your faults and your virtues; your merits and your weaknesses—you will be *lost*.

Life's prizes go to those who, knowing their potentialities, capture them, and strengthen them; who, realizing their faults, strive to overcome them. Grapho-Analysts help you to know yourself, and thus enable you to make the most of your capabilities, and to understand yourself by pointing out your weaknesses, gives you an opportunity to eradicate them.

Handwriting is not merely a matter of putting pen to paper. You have your brain in order to write. And the brain is the captain of your body. Everything you do emanates from the brain. Hence, handwriting is only the physical expression of the instructions coming from your brain.

And everything you are and can be summed up in your handwriting, as diagnosed by an expert grapho-analyst.

I have space for only a few brief extracts from character readings made recently. You are likely to be impulsive. You do not consider very long before acting. There is a slight strain in your nerves, but it does not let it grow. Your writing shows a distinct cultural trait; you have a desire to know more, to investigate and find out for yourself.

Miss M.—You have a great pride and a strong sense of duty, and memory and are very careful about details. You have a considerable regard for your own opinions, and are prone to regard yourself as full of originality and individuality. But in your own mind you have a tension that is not entirely sincere. I suggest that you try to be more of yourself, and your friends will like you all the more.

Do you want a personal reading of your own writing? Do you wish to know what your friends are really like? Send a letter in your normal writing, state birthdate (in each case), and enclose 10c coin and 3c stamped addressed envelope. If you send more than one specimen for analysis, please enclose coin for each. Replies will be mailed as quickly as possible, but please allow at least two weeks for reply. Address: Lawrence Hibbert, Grapho-Analyst, c/o Winnipeg Newspaper Union, 1 McDermott Ave. E., Winnipeg.

Poor Opinion of Women

Twelve-Year-Old Jackie Cooper Has Had Bitter Experience

Jackie Cooper, young motion picture actor, arrived in New York recently to fill a theatre engagement and said some bitter things about women. Jack is just 12 years old.

"Women are just suckers for your money," he declared, and then declared himself for celibacy.

"I don't think I'll ever have anything to do with them," he said.

Must Be Registered

After January 1, 1935, any person found to be in possession of a pistol or revolver when its ownership has not been recorded with the police authorities will be liable to a fine of \$50 or 30 days in jail, or both. This amendment to the Criminal Code was passed at the last session of parliament and it is being proclaimed in the Canada Gazette.

Motorist: "I want a chauffeur who can think quickly in an emergency." Applicant: "That's me, sir! I never smashed a car yet that I couldn't think up an A-1 excuse in five seconds."

The whale, in quest of food, goes down to the very depths of the ocean.

The Motor Horn

Suppression of Noise In England

During Hours Of Night

The city of London has tried an experiment in the suppression of noise with such success that the London rule is being extended to cover the whole of England. In London for some weeks past it has been an offence, punishable by fine, to sound a motor horn between 11:30 at night and seven o'clock in the morning. The celebrated English respect for law has again been in evidence. Motorists have agreed that a nightly closed season on honking is a good idea and have refrained from sound effects klaxons and hooters in the prohibited hours. A blessed quietude has resulted. People have been surprised to find out how large an ingredient in London's night noises the motor horn was.

But a curious, incidental and unexpected result of the regulation is that London at night is safer now than it was. A motorist who knows that he may not, under penalty of fine, warn the approaching pedestrian with a blast of sound is a more careful driver than he otherwise would be. The discovery of this fact suggests some reflections on the motor horn. Few would propose its abolition.

A motor car without sounding apparatus is good order cannot pass the safety tests. On the other hand, there are certainly too many motorists who think that the possession of an efficient horn gives them a license to take risks and scare pedestrians out of their wits. If drivers used their horns in emergency only and not as a routine method of clearing the streets, it is probable the streets would be safer.

They would be quieter too, of course. But the horn-blower who is the worst disturber of the peace is not the man who makes pedestrians jump. He is the young person who summons a friend by prolonged hooting outside the friend's house. The suppression of this nuisance daily from midnight to midnight would be welcome.—Winnipeg Free Press.

The natives of Java sleep on mere mats, while, all about them flourish the kapok trees, which furnish the fine silky cotton for mattresses.

Vary your menus with these tempting breads made with

ROYAL YEAST

YEAST

CAKES

FOR over 50 years Royal Yeast Cakes have been the standard of fine quality. Today, they are preferred in 7 out of every 8 Canadian homes where dry yeast is used in home baking. Individually sealed in air-tight waxed paper, they stay absolutely fresh for months. You can be sure of full leavening power every time you bake with them.

BUY MADE-IN-CANADA GOODS

Plans For Producing Valuable By-Products From Wheat Surplus Are Being Considered

Plans for producing valuable by-products from Canada's wheat surplus are being earnestly considered by a scientist at the Canadian Pulp and Paper Research Institute at McGill University.

Dr. W. Boyd Campbell, consulting physical chemist to the forest products laboratories, said that in China by an ingenious method scientists had succeeded in producing a valuable substance known as monosodium glutamate from wheat and added the surface of the possibilities of converting wheat into more costly products had never been scratched.

"If the Dominion," he said, "were to spend a small fraction of the money it has spent on providing transportation and handling facilities for the Dominion's wheat crop on research for new outlets and new uses of wheat, I believe the wheat surplus would in time become a forgotten bogey. I would suggest the Dominion government include in the budget, as a start in the right direction, the sum of \$500,000 to be used in this research over a period of five years."

The monosodium glutamate being made in China, of which China has sold between \$1,000,000 and \$2,000,000 worth annually, was until recently a rare chemical. It is used in China and Japan much the same as sugar and salt are used here.

Canadian wheat, with its comparatively high content of protein is the best wheat for manufacture of this condiment, the scientist said.

Wheat worth two cents a pound was thus transformed into a substance worth from \$2 to \$3 per pound.

Labors Will Occupy

Historic Old Cottage

Home of Anne Boleyn Bought By Henry Ford

The only home Anne Boleyn ever owned—a cottage near Chelmsford, England—has been bought by Henry Ford.

He is spending \$1,250 on having it rebuilt as it was 400 years ago, when King Henry came down from London to see his sweetheart who changed the course of English history.

Then it will be divided into town cottages, to be occupied by laborers on Mr. Ford's farm.

One of Mr. Ford's farm workers lives there now. Bull's Lodge—Anne's surname was—was spelled Bullen—stands back in a field behind a tangle of country lanes.

It was here, then, one day's march, now an hour's ride, from London, that the Crusaders of the middle ages pitched their first camp on their way to the Holy Land.

And it was here that Mr. Livermore, a south country shepherd, brought his flocks to graze six years ago. Down below, in the cellar, he found an underground passage leading to the castle across the fields. It was along this dark passage that Henry came to visit pretty Anne Boleyn. To-day the castle is a girls' school. Mr. Livermore gave up his flock to work for Mr. Ford.

Electric Eye Lights City

Turns Illumination On Each Night At Proper Time

Experiments in connection with long-distance control of street lighting systems have been conducted by the Stockholm Electric Light, and Power Company of Stockholm, Sweden, and satisfactory results obtained. A photo-electric cell, which is affected by light, announces the time for switching the street lighting system on and off. The "electric eye" gives the alarm irrespective of the time of day or night when the switch should be thrown in or out.

Shares Quickly Taken

The time limit for subscribing to shares in the Bank of Canada expired Sept. 21 at midnight and applications posted after that time were returned. In the five days during which the books were open subscriptions were received in a volume exceeding all expectations, with the result the issue was oversubscribed.

Wife (back from the shops): "Well, dear, I've found just the costume I've been looking for."

Husband: "Splendid! I certainly couldn't have afforded to buy it for you."

The only plausible reason for the grapefruit's name is that the fruits grow in clusters like giant bunches of grapes.

W. N. U. 2066

Busiest Doctor In World

Said To Be Chief Medical Officer Of London County Council

Much to the gratification of his many friends, Sir Frederick Kay Menzies, L.D., Chief Medical Officer of the London County Council, is well on the road to recovery from a leg injury which kept him indoors for two months. Notwithstanding his illness he has continued to watch over his vast department, which comprises 40,000 beds, hundreds of doctors, and 10,000 nurses—several L.C.C. hospitals contain more than 1,000 beds. The reorganizing of these institutions, when taken over by the L.C.C. from the Guardians in 1933, was a tremendous piece of work, which Sir Frederick performed with great ability and success. The Medical Officer is also responsible for the medical examination of school children. Sir Frederick is, therefore, perhaps, the busiest doctor in the world, but bears his manifold responsibilities with much equanimity and is deservedly popular with his huge staff.

500
NEW AND LOVELY FALL MODEL
THAT BUTTONS YOUTHFULLY
RIGHT DOWN THE BACK

You know that Paris is using yards and yards of rayon novelties that have the appearance of woolen, for fall dresses. And here's a delightfully smart example, and extremely easy to copy it exactly. It is a watermelon (an off-red) wooly rayon with printed white flecks. The deep yoke and belt are of plain dull beguine silk in toning watermelon shade. The buttons are black bone. It's so unusual, and high priced looking, you'll just love it. Back crepe marocain would also be attractive for it with the belt of self-fabric. Make the yoke of thick dull black satin. Have the buttons covered with the satin. Carried out in black satin, it's also exceedingly smart. Style No. 500 is designed for sizes 14, 16, 18 years, 36, 38 and 40 inches bust. Size 16 requires 3 1/2 yards 39-inch material with 1 1/2 yard 39-inch contrasting. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Screenings Used For Fuel

Furnaces At Power House At Churchill Fed With Weed Seeds

The elevator at Churchill requires very great power to operate. It has over six miles of belts which convey the grain from the bins to the ship's holds. Machines lift the freight cars filled with wheat on one end and then on the other, emptying the contents into the pits at the rate of two minutes a car. Fans elevators and a score of other appliances all function by electric power.

Furnaces in the power house produce steam that generates this energy, and most of the heat comes from pigweed seed. The furnaces are fed entirely from screenings obtained in clearing the grain which flows in from country elevators. No coal is used.

Wheat oats form the bulk of the screenings, but the tremendous heat as the fuel proceeds along the travelling grates under the boilers comes from the small black seeds about the size of pinheads. These are from the farms where pigweeds are a nuisance to the grain growers.

The grain arriving at Churchill is in the same condition as it leaves the threshers on the farms. The grading and clearing is done under the supervision of officials of the grain board. Since the elevator began operation more than three years ago, the supply of screenings has always been sufficient not only to supply power for the elevator, but to light up the port, including the spotlight on the tower whose rays stretch far out on the rolling waters of Hudson Bay. The bright light welcomes the ships of the world to this newest harbor.

Treasures Old Drum

No Sum Could Buy It From Great War Veteran

Money cannot buy the old bass drum located in Jack Munro's tailor shop at Windsor, Nova Scotia, after being "lost" for about 15 years.

It is the drum that Munro beat as he saw the 85th Highlanders of Nova Scotia bring glory to Canada at the memorable battles of Vimy Ridge and Passchendaele in the Great War. The strings are rusted now, but it still brings back the battle light to Jack's eyes. Embellished on the old drum the blue, gold and red crest of the 85th still stands out. Jack is seldom able to come down to his shop now and his wife looks after the customers. She unearthed the big drum in the back office and it now is the most prized treasure in the Munro home.

Troquais Indians dance about 20 dances in their ceremonies.

Nothing succeeds like the efforts of a man to be disagreeable.

Livestock Production In Canada

Increase In Exports To United Kingdom Is Shown

The fact that every province in Canada is well adapted to the production of livestock gives this industry a wide basis across the Dominion. Canadians are generous meat eaters, consuming in 1933 an average per person of 74 pounds of pork, 56 pounds of beef, 10 pounds of poultry and 6 pounds of mutton and lamb. Each Canadian, on the average, supplements these rations with 30 pounds of butter, about 3.5 pounds of cheese, and more than 21 dozen eggs.

To supply the home market is therefore a large order for the Canadian livestock, dairy and poultry industries, and considerable contributions are also made to foreign trade.

During 1933 there was an increase in exports of live cattle to the United Kingdom, the total for the year being 50,317 head compared with 16,568 the previous year. About 10,000 head of cattle were exported to other countries. Exports of beef in 1932 amounted to over 10 million pounds compared with about 4 1/2 million in the previous year, and exports of pork jumped from 46 million to 79 million pounds.

The estimated number of meat and dairy animals in Canada as at June, 1933, was: Milch cows, 3,694,000; other cattle, 5,182,000; sheep, 3,885,000; swine, 3,800,700. All classes of poultry numbered over 59,000,000. The gross agricultural wealth of Canada in 1933 was estimated at \$5,230,944,000 of which \$403,135,000 was represented by livestock and \$33,458,000 by poultry on farms.

Returns From Northern Voyage

Capt. Bartlett Secured Much Scientific Data During Trip

Returning from the north with valuable specimens of wild life and much scientific data, Captain Bob Bartlett arrived recently on the ice-scarred schooner Morrisey, and described his trip as "the most successful" of any of his many adventurous voyages.

The veteran explorer was unable to break his way through the ice to the Peary monument, but from a position 25 miles away could see the sun's rays reflected from the bronze top.

Under the auspices of the Academy of Natural Sciences of Philadelphia, he led a scientific party into lonely northern channels late in June and spent the summer collecting material believed to be of great value.

It is estimated that at least 3,000 lambs weekly are required to supply the retail butcher trade at Montreal. The supply is short of the demand.

More than 1,000 Japanese ships have been equipped with radio telegraph equipment.

Outbreak Of Pale Western Cutworms Of Unusual Severity Forecast After Annual Survey

Preserving Old Parchments

Britain To Collect Priceless Documents Under One Roof

Parchments recording the birth of kings, the execution of queens, love letters of princes, and the trembling signatures of traitors and thousands of other historic documents may soon be gathered together into one central museum of British records in London.

At present these priceless papers are scattered in various buildings, such as the Records Office, the British Museum, the College of Herald, the House of Parliament, Lambeth Palace and Windsor Castle.

Lord Hanworth, master of the rolls, who is chief of the public records office, is the moving spirit in this plan to bring together these scattered leaves of our national history.

It was he who a few months ago took steps to prevent the destruction of ancient parchments in the hands of owners ignorant of their value.

It is illegal to sell parchment records for commercial purposes until the state has examined them.

Recently it was found that large numbers of ancient records had been sold to make heads for toy drums. In another case parish records were being used as grass-proof paper in a field fish shop.

Among the documents which may soon be brought under one roof are the execution of Mary Queen of Scots, the last letter of Anne Boleyn to Henry VIII, the wills of the kings and queens of England from Elizabeth to William IV, the death warrant of Charles I, and Magna Carta.

Should Have Advertised

British Honduras Neglected Publicity Campaign For Chief Product

In this age when so much depends on international trade, even a sharp decline in the use of chewing gum can financially embarrass everybody and throw out of kilter the occupations of a "tiny nation."

For a number of years the people of British Honduras have been subsisting mainly upon the proceeds of the sale of chicla, the raw material out of which chewing gum is made. When the depression started people began cutting down on things that weren't absolutely necessary. Chewing gum came under that category. Consequently the exports of chicla dropped and that colony is reported to be facing a financial crisis due to the loss of trade.

Now the citizens of British Honduras must do something else to keep the wolf from the door. They have decided to develop their banana, citrus fruit, and hardwood exports in order to avoid bankruptcy.

Apparently the British Honduras are not resourceful enough. When they noticed that the exports of chicla were on the down grade, they should have staged publicity stunts to boost their business. For example, contests to see who can stretch gum the farthest and who can chew the biggest wad would no doubt increase the sale of gum and help the chicla trade. Perhaps it is not yet too late to try this suggested stimulant.—Brockville Record and Times.

Nothing More Unightly

Tattered Billboards Are A Blot On Any Road

Alderman Allan Towe, of London, may have been joking when he brought the matter up, but we quite agree with him when he protests down or cover up their billboards after the show is over. The same thing should be done in the case of political candidates and others who make use of this medium of reaching the public. We can't think of anything more unightly than tattered billboards telling of an event that is "dead and buried."—Border Cities Star.

Without Government Aid Farmer's Advocate says: "The Ontario Minister of Agriculture, Honorable Duncan Marshall, is reminding fair boards that the Highland and Agricultural Society of Scotland has been holding shows for 100 years without receiving any government aid. More than that, they have \$180,000 tucked away in reserve. Perhaps we'll just have to have more Scots on our fair boards."

Male for meals keep watch over their harem from April to July, without food, drink or rest.

Hard On Booksellers

British Dealers Buying Back Many Fake First Editions

Booksellers in London are burning books for which hundreds of pounds were paid a few years ago. They are catalogued first editions of the Brownings, Wordsworth, Swinburne, and other famous authors, which have been declared by John Carter and Graham Pollard—two young bibliographers—to be forgeries.

Consternation has been caused in England and the United States by the assertion, because the books are not only in the possession of many private collectors, but also in honored places in public libraries and museums.

A number of booksellers who bought the volumes in good faith at auctions are now paying out hundreds of pounds to customers to whom they resold them.

One West End bookseller with a large British and American clientele said: "I have written to all my clients who are in possession of these volumes offering to repay the full purchase price upon their return. As the volumes come back I am burning them."

Why Go To College?

Answer Depends On Whether Education Is Really Desired

The question whether in these days it is worth while to go to college cannot be answered in any general way. It depends entirely upon the young man or young woman concerned. If the idea in mind is to have a good time, enjoy social activities, indulge in athletics and at some time emerge with a degree, then by all means stay away. The universities have been tightening up on this type of student for some time past and they are going to tighten up as never before this year. Social parasites will be given no welcome, the university is not for them. There is but one legitimate reason for going to college and that is to secure the training and discipline that a college can give. As for the college it has no time to waste its efforts on people who are not after training and discipline.

Typist: "Do you know what time I have to get up to be here by nine?" Boss: "No. Why not get here by nine and find out?"

Annual world production of silver is about 250,000 ounces, the bulk of which is used by the chemical industry.

Foot ailments affect two women for every man.

WORLD HAPPENINGS
BRIEFLY TOLD

Lord Baden Powell is sailing on a world inspection tour of the Boy Scout movement, of which he was the founder. The tour will end in Canada and will last 10 months.

Air service connecting Algeria and French west and equatorial Africa was established when the first mail plane, which left Algiers, Sept. 7, returned after a successful flight. The other terminus is Brazzaville.

Dissolution of the York County Children's Aid Society board, of which former Premier G. S. Henry was chairman was announced by Hon. David Croft, Ontario minister of public welfare.

Boycott of all firms paying unfair wages or forcing their employees to work under sweltering conditions was urged by J. F. Marsh, Ontario deputy minister of labor, in an address to the Toronto Local Council of Women.

Adoption of a national health insurance scheme will be urged at the proposed Dominion-provincial conference at Ottawa this fall by Hon. G. M. Weir, British Columbia provincial secretary, in a brief presented on behalf of the Canadian Medical Association.

To mark the centenary of South Australia state in 1936, the government has received a gift of \$500,000 towards completion of the new parliament houses. The donor is Sir Langdon Bonython, proprietor of the Adelaide Advertiser, and one of Australia's foremost industrialists and philanthropists.

Little Journeys in Science

CARBON MONOXIDE

(By Gordon H. Guest, M.A.)

Frequently we read of accidents caused by the escape of carbon monoxide gas from the exhaust of motor engines or from furnace pipes. Produced by the burning of carbon, in coal gas, and in motor exhausts, this gas, which is also known as carbonic oxide, is very poisonous, and is doubly dangerous because it has almost no odor, and overcomes victims so quickly that they rarely have time to escape from the fumes.

The deadliness of the gas lies in its action on the blood, where it displaces the oxygen in the haemoglobin, through which it reaches the body tissues. It is identified in the body because of the bright red color which it gives to the blood.

It is estimated that one volume of carbon monoxide in eight hundred volumes of air is fatal when breathed for half an hour, while much smaller quantities are known to produce unpleasant effects if inhaled for any length of time. Small cars travelling at fifteen miles per hour are said to give off forty-one cubic feet of carbon monoxide per hour, while a large car gives off one hundred and eighty-four cubic feet of the gas in one hour. Thus, in large cities the air continually contains small amounts of the gas, and considerable attention has been given in some centres to purifying the air, particularly in tunnels and underground railways. This is done by passing the air over a substance known as hopcalite, which changes carbon monoxide into harmless carbon dioxide.

Mice and birds are particularly sensitive to carbon monoxide and sometimes rescue crews in mines take canaries in cages with them into the mines following an explosion in which this gas is believed to have been released.

"What is a molecule?" asked the teacher.

"A molecule," said John, "is something so small that it can't be seen, even through a microscope."

Russia A Powerful Factor

Much Safer To Have Nation Member Of League

Russia has been admitted to the League of Nations. Any other outcome would have been incredible, granted Russia's willingness to come in.

The League of Nations is an agency—faulty, perhaps, but the most effective in existence to-day—for the preservation of peace in the world. Whatever we may think of the Soviet theories of government, and their practice, the fact remains that Russia is one of the great nations, her policies and ambitions a powerful factor in world affairs. Obviously, therefore, it is much safer to have Russia on the inside with Britain and France and all those associated with them, than on the outside with Germany and Japan and the United States as critical observers.

Those who would have excluded Russia from this free assembly of the nations think of the League as a sort of secret society for a few of the fantastically absurd. If Russia is a menace to world peace through her plan of government, there is all the more reason for subjecting her to the presumably pacifying influences of League membership.—Ottawa Journal.

"Haven't I seen you somewhere?" asked the young man.

"Quite likely," replied the girl. "I've been there."

The man who pays as he goes seldom gets beyond the speed limit.

More than \$7,500,000 was spent by tourists in Norway last year.

The SNAPSHOT GUILD
THE "WHY" OF LENS STOPS

PRACTICALLY all camera, with the exception of a few extremely simple models, have some means of varying the amount of light passing through the lens. Why?

Well, why do you tend to squint in bright sunlight? Simply because there is so much light in the open sun that, unless you squint, your eyes cannot distinguish details; in the dark your eyes distend in order to take advantage of every available ray of light.

Cameras and eyes are much alike. Unless you control the amount of light entering the camera lens, your eye will almost certainly overexpose shots made in bright daylight and underexpose when the light is low. Get out your camera and look at its lens. If yours is a simple box camera, you will find that the lens opening, or diaphragm, has two possible settings, one for average shots and one for use when the light is very brilliant. In certain other cameras diaphragm settings are arbitrarily numbered from 1 to 4, giving you that many opportunities to adapt your snapshotting to light conditions.

The best known system of diaphragm control is the "f" system, used on more advanced cameras. In this system "f" represents the ratio between the lens opening and the distance from the lens to the film. When someone says that he took a picture at f11, he means that his lens was adjusted so that its opening was 1/11th of the lens-to-film distance.

Church Of England Synod Urges Action By Parliament

Canada should segregate her youthful criminal offenders during both trial and prison terms, the synod of the Church of England decided.

On motion of Magistrate J. E. Jones, Toronto, a resolution was passed urging the parliament of Canada to provide separate trials for boys between 16 and 21 years of age and separate penal institutions, similar to the Bormal system in England, where possible.

Most Rev. J. C. Roper, archbishop of Ottawa, seconded the resolution and undertook to bring the matter before the government.

Up to the age of 16, Magistrate Jones explained, the juvenile courts were available, but between that age and 21 there was no special provision. He pointed out the dangers to young offenders of contamination with older and more hardened criminals.

The synod also approved another resolution by Mr. Jones, urging provincial governments to implement Dominion government legislation respecting probation where it had not already been doing the job.

It was certainly the younger offenders to whom attention should be directed, said Rt. Rev. A. Sovereign, bishop of Athabasca. "There are few grey-haired men in our penitentiaries now," he declared. "They are boys, many of them about 18 years old."

The Nazi flag of Germany is prohibited in the province of Buenos Aires by presidential decree.

Buttermilk has the same food value as skim milk.

SUNDAY SCHOOL LESSON

OCTOBER 7

FELLOWSHIP WITH CHRIST

Golden Text: Abide in me, and I in you. As the branch cannot bear fruit of itself, except it abide in the vine; so neither can ye, except ye abide in me. John 15:4.

Lesson: John 15.
Devotional Reading: Matthew 4: 18-26.

Explanations and Comments

Fellowship with Christ and Fruitage, verses 4:11. "Abide in me and I in you." Abide occurs some sixteen times in John's Gospel. "Abiding in Christ is something more than basking in Christ." (Horace Bushnell).

You can hear fruit only by abiding in me: In and through you I will live henceforth, is Jesus' promise. How can one abide in Christ, amid the duties and pleasures of life, can one keep one's mind always fixed upon Christ? You are in a life into which you step out of it, though you may not be thinking of the life. You keep on a road until you take a turning right or left, although, engrossed in converse with your friend, you do not think of the road. You are in Christ amid the pressure of daily care, and the haste of business, as long as your face is toward the Lord, your attitude that of humble submission, and your conscience void of offense. (F. B. Meyer).

"Apart from me ye can do nothing." One who abides not in Christ is cast forth as a useless branch, and the vineyards' such cast-off branches are gathered and burned. "The thought is not to be so pressed as to raise the question of the loss of souls who are once united with Christ. We are concerned here with service rather than salvation. The words, however, are not without serious implications as to the absolute union with Christ." (Charles F. Smith).

"Heaven is my Father glorified, that ye have much fruit." To "glorify God" means to recognize and acknowledge his true character. The Father is the Husbandman; much fruit testifies to his skill and care. "And shall ye be my disciples?" "Abide in my love: even as the Father hath loved me, I have loved you. And then Jesus reminded them that it was only through obedience to his commandments that they could do so, and further encouraged them in obedience by adding that he had remained in his Father's love by keeping his Father's commandments.

Largest Flag in World

A society has been formed to hoist a Japanese national flag, which, it is claimed, will be the largest in the world, on the summit of Fujiyama, the sacred mountain of Japan. The flag will be 80 feet long and 56 feet wide, and when hoisted, will be visible from a great distance.

SOURD ON THE

WORLD?—THAT'S LIVER

Wake up your Liver

No Calomel necessary. Many people who feel sour, sluggish and generally unwell make the mistake of taking salt, oil, mineral water, laxative candy or other such things, or scouring with only more the bowels and ignore the liver.

You need to wake up your liver. Start your liver going with only two pounds of liquid into your bowels. Get your liver and intestines working as liver cleanser. Recipes For This Week

(By Betty Barclay)

CHOCOLATE NUT CAKE

½ cup butter or butter substitute
2 cups sugar
4 eggs
1 cup mashed potatoes
2 squares chocolate
2 cups flour
¾ teaspoon baking powder
1 teaspoon cinnamon
½ teaspoon mace
¾ teaspoon grated nutmeg
½ teaspoon ground cloves
1 cup chopped Brazil nuts
½ cup milk

Cream the butter or butter substitute and one cup of sugar. In another bowl, beat the egg-yolks with the remaining cup of sugar. Combine the two mixtures. Have ready the nut mashed potatoes, which should be without lumps, add to them the melted chocolate and combine with the first mixture. Mix and sift the dry ingredients and add the nut meats. Add to the cake mixture, alternating with the milk. Fold in the stiffly beaten whites. Bake in a loaf pan in a moderate oven. When cool, cover with marshmallow frosting or boiled frosting. This is a large moist cake, which will keep well.

ORANGE MILK FOAM

(Serves 1)

6 tablespoons orange juice
6 tablespoons evaporated milk
6 tablespoons cold water
1 teaspoon sugar
1 teaspoon grated orange rind

Beat or shake thoroughly. Serve at once in a large glass, chilling with ice if desired. Fresh milk may be used in place of evaporated milk. This is an excellent mid-meal drink for children who are undernourished. It is also a good beverage accompaniment for meals. Evaporated milk makes the drink very economical.

Ask Mother—

She Knows

Mother took this medicine before and after the babies came. It gave her more strength and energy when she was nervous and rundown. Keep her on the job all through the change. No wonder she recommends it.

WILL PROPOSE AMENDMENTS TO THE B. N. A. ACT

Ottawa.—The British North America Act, that aged document which at once binds together the provinces of Canada in one vast national unit, yet stands as a bulwark of protection of peculiar provincial rights, will be the bone of contention at a momentous conference in Ottawa, probably in November.

While the date of the conference is no nearer fixed than when Prime Minister R. B. Bennett sent out the call to the provincial premiers the first of this month, most of the provinces have signified their willingness to attend. Their comments or suggestions on the proposed amendments to the constitution have yet to be made but will probably be ready by the end of the month.

It is proposed to have the provinces yield to federal government control the exclusive jurisdiction with respect to such social matters as unemployment insurance, hours of labor and minimum wages, certain forms of taxation, company laws and possibly trade regulations involving private property.

The British North America Act which brought the first three provinces into one Canadian confederation in 1867, made no provision for possible amendment. There have been amendments and the general practice has been to secure them by joint resolution of the senate and house of commons addressed to the Imperial parliament in London. On occasions they have been secured on the sole representations of the prime minister but that was many years ago.

It will be the objective of the forthcoming conference to secure approval of certain proposed amendments and also to secure, by concerted action of the provinces and the Dominion, approval by the British parliament of a purely Canadian method of amending the constitution.

If the latter objective is achieved it will then be possible for the Canadian people, as represented by their members in parliament, to make whatever amendments circumstances dictate without further reference to London.

Aftermath Of Yacht Race

Will Not Enter Another Challenge, Says Sopwith

Newport, R.I.—Endeavour, the trim sloop which completed an unsuccessful but impressive bid against Rainbow for the America's cup, is not for sale.

Her owner, T. O. M. Sopwith, said emphatically, "I am not selling Endeavour," when he was advised of reports that a movement was afoot in Nova Scotia for a group of Canadian yachting enthusiasts to purchase the blue-hulled yacht and challenge the United States for the America's cup. Sopwith said there was no reason why he should sell the craft.

"She is going back to England inside of a fortnight," he added. "I'm going to race her next summer in England."

While Sopwith has flatly said he will never challenge again, there were many here who held to the opinion a challenge would be forthcoming nevertheless.

The 1934 races, most turbulent in the history of the cup, continued to be the chief topic of conversation in yachting circles and there was an amazing agreement of opinion. The most salient points on which there was more or less accord was that the Endeavour was a faster boat than the Rainbow and that superior seamanship was the factor that enabled the United States boat to overtake and vanquish the Endeavour.

Those who argued Britain would again challenge for the cup held that Britons must have been encouraged by the fine showing of the Sopwith yacht.

Members of the Rainbow camp did not hesitate to admit they were extremely lucky in edging out the big blue invader.

Making World Tour

Montreal.—The freighter City of Kenaville, which sails from Montreal October 6, will be the first vessel out of this port to make a complete round-the-world circuit. The ship will go through the Panama Canal to the far east and will return by way of the Suez Canal and across the Atlantic.

League Protest

Warsaw.—The national minority committee of White Russians lodged a protest with the League of Nations Assembly against the Soviet entry into the league, the government newspaper Kuryet Pranny reported.

Kidnapping Menace

Hon. Arthur Roebuck Addresses Conference In New York

New York.—Hon. Arthur Roebuck, attorney-general for Ontario, laid before law enforcement and crime prevention authorities of the United States, a plan designed to eradicate the growing menace of kidnapping for ransom.

The law's reply to challenges from kidnappers, he declared, should be "certainty of apprehension, and make the business unprofitable." This would be accomplished by making it illegal to pay a ransom and by withholding all police authorities into a mobile unit which could be stretched out in any direction at sudden notice.

Mr. Roebuck, speaking at the New York Herald-Tribune's conference on current problems of 1934, emphasized his opposition to what he called centralization of police authority "and the reorganization of our civil officials on the basis of a standing army." But what he thought was required was "generalship; and generalship necessitates unified control."

There was no need for centralized management of all our forces, he said, but only centralized command all resources in the hands of a unified criminal investigation department.

He told of his plans to submit at the next session of the Ontario legislature measures designed to widen authority of this branch of the Ontario Provincial Police.

He also told of his preparations to submit to the legislature a proposal which would "entrust the executive with power to supervise the bank accounts and other resources of relatives, friends and other persons who they are subject to the pressure of such illegal demands, and by so doing thus forcibly prevent payment of ransom."

Mr. Roebuck agreed such measures might prove harsh to relatives of a kidnapped victim but he expressed the conviction that if plotters knew in advance a ransom could not be paid and such payment would be prevented by law authorities, kidnapping would not have been kidnapped. It is not new that the state should ask individuals to bear hardship for the common good.

Returns To England

Premier Ramsay MacDonald Much Improved After Long Holiday

St. John's, Nfld.—In this old Newfoundland capital, Premier Ramsay MacDonald of Great Britain delivered his farewell address to the new world on the eve of his departure for the Old Country to take over once more the reins of government. His sight improved and his general health restored by a long holiday in Canada and Newfoundland, the British prime minister sailed Sept. 28 aboard the liner Nova Scotia for Great Britain with his daughter, Isabel, who accompanied him on the tour.

May Reduce Exams

Toronto.—Ontario department of education plans to reduce the number of student admission examinations, it was announced by Duncan McArthur, deputy minister of education. The object is to lower costs and save students a certain amount of work.

28th Battalion Reunion

Association Celebrates 20th Anniversary Of Mobilization This Year

"First call" has sounded to members of the 28th North West Battalion Association for the annual reunion.

This year the battalion celebrates the 20th anniversary of the mobilization for overseas. Arrangements are now being made for the annual reunion to be held at the Kitchener hotel, Regina, on Saturday, November 3.

Announcement was made of appointment of a committee to take charge of arrangements under the chairmanship of Colonel J. A. Cross. The committee is composed of: Colonel A. G. Styles, Major G. Fraser Stewart, P. Tappin, P. Hood, S. Kramer, program, Major Walter McInnis, E. D. Walker, J. V. Douglas, P. Harradence, H. C. Bull, ticket and attendance, H. C. Bull, L. G. Geernaert, H. Ricknell, S. Kramer; publicity, Colonel James McAra, P. Cretney; church parade, Brigadier-General Embury, Captain P. Harradence.

Members of the battalion are requested to communicate without delay intention to be present. Such intention should be forwarded to P. Tappin, 4004 Dewdney avenue, Regina, or J. V. Douglas, secretary of the Battalion Association, 3229 Eighth avenue.

Wants To Keep Control

British Columbia Reluctant To Surrender New Wage Law

Victoria.—With what he considers higher wage standards and labor conditions in effect in British Columbia than in other parts of Canada, the province would be reluctant to surrender control over its minimum wage and labor regulations to the Dominion authority, Hon. G. S. Pearson, minister of labor, stated.

According to the estimate of Premier T. D. Pattullo, payrolls in British Columbia have been increased \$500,000 monthly by minimum wage scales put into effect in the province during the present year.

Mr. Pearson was speaking of the report that the Dominion might propose taking over control of wage scales, at the coming Dominion-provincial conference. He is in agreement with the idea of having wage legislation adopted throughout Canada but is opposed to the Dominion settling scales for this province. British Columbia is willing to discuss the matter of wages for the whole of Canada but not that she feels so right, stated the minister.

Trapper Found Dead

Distress Flag On Island Failed To Attract Attention

Vancouver.—A white distress flag hanging from the front door of his lonely cabin at the south end of Cortes Island, failed to attract aid for George Reanson, aged 55. When Warden Roy E. Allen, of Powell River, B.C., visited Reanson's cabin September 21, he saw the signal on the door and found the owner lying face down on the floor. He had been dead more than a month from natural causes.

REQUEST OF RUSSIA CAUSES STIR IN LEAGUE

Geneva.—Russia's surprise move to get the council of the League of Nations to strike a balance on disarmament apparently had stirred up a hornet's nest.

Because of the "dynamic" request in Foreign Commissioner Maxim Litvinov's request that the council obtain a report on whether the disarmament conference can be successfully resumed, efforts were made to induce him to withdraw it.

Statesmen in some quarters were known to be apprehensive lest a report from Arthur Henderson, president of the disarmament conference, might blame failure of the conference on Germany's withdrawal.

This, it was explained, inevitably would raise the question of the alleged re-arming of Germany in violation of the treaty of Versailles—a question some countries are desirous of avoiding.

Litvinov's proposal would throw the whole question of disarmament back into the lap of the league council, which then would be responsible for choosing the path leading to disarmament. The proposal was contained in a letter to Richard Sander, resident of the league assembly.

RT. REV. W. C. WHITE

Following an appeal from Bishop White, who recently resigned as Bishop of Hoonan, China, the General Synod of the Church of England in Canada has granted independence to the diocese in the Far East.

Handle Poultry And Eggs

Marketing Plan To Regulate Sale May Be Considered

Ottawa.—Submitted by Western livestock and poultry interests, the Dominion marketing board had under consideration a marketing scheme to regulate the sale of poultry and eggs from Manitoba, Saskatchewan and Alberta. A possibility exists the scheme for poultry may be adopted in time to handle the fall marketing. Another scheme emanating from the west also is before the board.

Both schemes were presented by R. P. Roblin, president of the Saskatchewan Livestock Producers' Co-operative Association; G. H. Barr, Regina lawyer, and W. A. Landroth, Winnipeg, of the Canadian Poultry Pool.

Signs Amnesty Decree

King Victor Emmanuel Releases Many Short Term Prisoners

Rome.—King Victor Emmanuel celebrated the birth of his granddaughter, Maria Pia, by signing a decree of amnesty liberating all prisoners sentenced to two years or less in jail.

Although the amnesty does not apply to political offences and certain heinous crimes, it includes many military offences and will result in the release of many thousands of prisoners.

Not only that, the amnesty cuts two years off sentences of more than two years duration.

Held Conference Over Radio

London.—Over a world-wide wireless telephone network the Sydney, Johannesburg, Bombay, New York and London branches of a well known British engineering firm were linked up last week for purposes of a conference. The voices came over distinctly and the conference was voted a success.

Britain's Low Phone Rates

London.—New long-distance telephone rates announced for Britain, include some of the lowest rates in the world, said the post office. Large reductions are made in present rates. It will be possible to talk for three minutes in the evening between any two points in England, Scotland and Wales for a maximum of 25 cents.

THE ROYAL COUPLE TO WED IN NOVEMBER

This picture shows the arrival of Prince George and Princess Marina from Munich on their way to visit King George and Queen Mary at Balmoral Castle. The newly engaged royal couple will be married at Westminster Abbey on November 29, and it is understood that the Prince of Wales will be best man.

Win Balloon Race

Believe Poland Has Swept Honors In Competition

Warsaw.—Poland, playing host to the 27th annual Gordon Bennett balloon race, apparently had swept honors in that competition.

Official results will be delayed several days, it was announced, pending the arrival of the balloonists' landing books.

It was believed the Polish "Barysawa" (Warsaw), crewed by Z. Burzynski and J. Zakrzewski, which landed near Riazan, Russia, was the winner, having covered approximately 750 miles.

The "Kosciuszko," piloted by Captain Franciszek Hynek, which landed near Voronezh, Russia, was believed to have taken second place.

The third Polish balloon, the "Polonia," burst and fell into a lake some 200 miles north of Helsinki, Finland. Its chances for third place were believed good.

All 16 that took flight have been reported safe.

LAUNCHING OF THE GIANT LINER "QUEEN MARY"

Clydebank, Glasgow, Scotland.—The Queen christened the giant new Cunard-White Star liner 534 the "Queen Mary" as the great ship started down the ways to the water.

The Queen Mary, which it is believed will be the new queen of the seas, slid down successfully in a perfect launch.

The choice of the name of a living queen for a christening was most unusual. Right up until the moment of the actual christening, no one had announced what the great ship's name was to be and the suggestion "Britannia" ruled a favorite.

The launching followed a short speech by King George. The Prince of Wales was present besides a multitude of other notables.

After the welcome speeches to the king and queen His Majesty replied:

"I thank you for the loyal address of welcome to us. As a sailor, I have deep pleasure in coming here to watch the launching by the queen of this great and beautiful ship."

"The sea with her tempests will not readily be bridled. She is stronger than men, yet in recent times man has done much to make the struggle with her more equal."

"It is still less than 100 years since Samuel Cunard founded a service of small wooden paddle-steamers for carrying mail across the Atlantic to America. Those first Cunard ships were of 1,150 tons. A few people now alive must have in their childhood have heard those ships spoken of with wonder as evidence of man's mastery over nature."

"Today we come to the happy task of sending on her way the stately ship now in being. I thank all those here and elsewhere whose efforts, however unobtrusive or humble, have helped to build her."

His Majesty remarked that for three years the uncompleted hull had lain on the stocks, until a government grant enabled resumption of the work.

"We know full well what misery a silent dockyard may spread among a seaport, and with what courage that misery may be endured," the king said.

"During those years when work upon her was suspended, we grieved for what that suspension meant to thousands of our people."

"We rejoice that with the help of my government it has been possible to lift that cloud, and to complete this ship."

"Now," with hope of better trade on both sides of the Atlantic, let us look forward to her playing a great part in the revival of international commerce."

"It has been the nation's will that she should be completed, and to-day we can send her forth, no longer a number on the books, but a ship with a name in the world, alive with beauty, energy and strength."

"Samuel Cunard built his ships to carry mail between two English-speaking countries. This one is built to carry the people of two lands, in great numbers, to and fro, so they may learn to understand each other."

"Both are faced with similar problems, and they prosper and suffer together. May she, in her career, bear many thousands of each race to visit each other as students and return as friends."

"We sent her to her element with the goodwill of all nations, as a mark of our hope in the future. She has been built in fellowship among ourselves. May her life among the great waters spread friendships among the nations."

BENNETT MAKES STRONG PLEA FOR WORLD PEACE

Paris.—Prime Minister R. B. Bennett, speaking at a banquet in his honor at the Inter-Allied Club here, made an impassioned plea for international peace and friendliness.

"When Canadians traversed the seas to maintain peace," he told the 150 diplomats and prominent Frenchmen gathered at the banquet, "they believed it would come again."

"Canadians know how earnestly France has striven for peace," he said. "In these days of rapid communications, the repercussions of what takes place in France to-day are felt in Canada tomorrow."

Pierre-Etienne Flandin, minister of Public works in the Doumergue cabinet, proposed the Canadian premier's health and acknowledged Canada's hospitality at her recent Jacques Cartier quatercentenary celebration. Flandin headed the French delegation to the celebration.

Introduced by Hon. Philippe Roy, Canadian minister in Paris, the premier took occasion to make smiling references to politics at home.

He said he hoped the guests would not consider him too great a man "as the by-election at home indicate I am not."

"Naturally when a government has not yielded to inflation it does not receive the plaudits of the people," the premier said. "But there are signs of improvement now."

"Owing to the gold mines and productivity of land and forests the Canadian dollar is worth more than the American one."

Desire New Conference

British Chamber Of Commerce Suggests Calling Imperial Meeting

London.—The British Chamber of Commerce unanimously passed a resolution urging the government to take opportunity of the King's silver jubilee celebrations next year, when leaders from the Dominions will be in London, to call another Imperial conference.

This conference could review the trade position in the light of the Imperial agreements signed at the Imperial economic conference in Ottawa in 1932, it was pointed out. Figures showed that Britain's exports to the empire had topped her exports to foreign countries this year for the first time in history. Only a few days ago Ottawa reported an increase of Canadian trade with the rest of the empire more than accounted for her total increase over last year.

In the first eight months of the year British exports to empire countries increased by more than \$60,000,000 over last year, or 14.2 per cent. Exports to foreign countries increased by \$13,750,000, or 2.9 per cent.

The net effect was to bring the empire exports \$3,315,000 higher than exports to foreign countries.

Boy Scout Campaign

Flea Is Made By Lord Beasborough For Increased Membership

Ottawa.—An earnest appeal for a campaign having for its object an increase in the number of Canadian Boy Scouts from 65,000 to 100,000 was made by Lord Beasborough, governor-general, here. Addressing the commissioners and provincial presidents of the Boy Scouts' Association at their banquet, Lord Beasborough, recalling that next year Canada would be visited by Lord Baden-Powell, founder of the movement, urged his hearers to welcome him with a membership vastly increased over its present numbers.

Hon. H. H. Stevens paid tribute to the splendid character of the men associated with scouting.

S. J. Latta of Saskatchewan was presented by the Canadian Boy Scouts' badge of the Silver Wolf during the evening.

Col. J. H. Woods, provincial president, Calgary, assured the governor-general his wishes for an increased membership in the Boy Scouts' movement would be accomplished.

Will Represent Canada

Ottawa.—Rt. Hon. Arthur Meighen, government leader in the senate and member of the cabinet without portfolio, will attend the centennial celebrations at Melbourne, Australia, next month, as representative of the Empire Parliamentary Association and of the Dominion government. He will sail from Vancouver on October 20.

W. N. U. 2096

A Growing Evil

Gambling On Sporting Events Has Tainted Modern Thought

"Bet you!" How frequently this expression pops into speech. "You bet" has become an American synonym for the affirmative in reply to questions. "Put up, or shut up" ends most arguments. As idioms these phrases may seem harmless, but idiom has its roots in the thoughts and customs of a people.

With too many nowadays everything is a gamble. People bet on anything—stock or grain prices, differences of opinion as to facts, whether the passing auto license will have a last number odd or even, or a fly will within ten seconds return to a bald man's head.

Most common of all, however and perhaps the main source of this problem of modern society, is gambling on sporting events. One needs only to observe how many of those around him at lunch are studying racing forms, or keep his ears open in the vicinity of his office building for conversation about baseball pools.

Strictly speaking the very word gambling itself implies money staked on the outcome of sporting contests. Gambling thus closely associated with sport has demoralized many phases of beneficial activity. Those branches of sport not degraded have been protected only by the most determined surveillance.

Worse than its effect on sports, however, is the influence upon those who indulge. They yield to a desire to profit at the expense of others, to get from another man without giving an equivalent for it. It may seem innocent to bet a dollar with a friend on the outcome of some contest but the seed is there. And what is to prevent such a seed, cultivated, from growing?

Consider the character of those who gamble most, the professionals who have abandoned all productive endeavor. Are they not everywhere known as leeches on honest endeavor? Yet gambling has become so common their standards of behavior are accepted and imitated, and a notorious gambler may mingle with honorable society.

Desire to gamble is recognized by penal authorities as the driving force behind bank robberies, swindlers and kidnappings. The criminal might earn in useful work the modest sums needed for ordinary living, but gambling requires large sums. The police chief of one great city has testified that he protected a few gambling houses, having an understanding with the proprietors who could be depended on to act as informers. The first places the average criminal goes with his loot is a gambling house, he said.

The association of gambling with sporting events has contributed to its popular acceptance, to the general unconsciousness of its evil. It has so tainted modern thought that many otherwise honest and logical persons cannot see why it is evil.

To escape eventual condemnation, sport must cease to send out this poison into mass thought. In fact, sport, to be real sport, must be purged of the gambling taint. A beginning should be made.—Christian Science Monitor.

Pupil Turns Teacher

Helen Keller Now Instructing Benefactor in Braille System

In the quiet of northern Scotland for the past 15 months Helen Keller and Ann Macy changed their lives about with the famed blind-deaf author in the role of a patient teacher.

The labor of love softened to some extent the tragedy which came late in life to the woman under whose tutelage Helen Keller rose to eminence.

Ill and almost totally blind, Mrs. Macy learned to read by the Braille system, from the hands of the woman she took as a girl of seven, to teach to read, think and talk.

Despite the strides Mrs. Macy is making in Braille, her health is at a low ebb, and two operations may be necessary when she returns to the United States, one physical, the other optical.

Hog Cholera In East

Serious inroads of hog cholera on animals in the Haute Ste. Marie district brought combative measures from the Ontario department of agriculture. Efforts to check the outbreak are being made with the use of serum. In one herd 53 animals were affected, 38 of them dying. The remainder had to be exterminated. Twenty-seven pigs were killed in an attempt to stamp out the disease in another section.

The average man would rather compromise than fight.

EXCELLENT VIEWS OF THE BRITISH AND UNITED STATES YACHTS

Here are the yachts in the international races for the America's Cup in England; right, the Rainbow, piloted by Harold S. Vanderbilt, of the United States. Rainbow awarded decision with four wins.

Subject To Revision

Egg-Grading Law Can Be Changed If Necessary

Egg grading has done more for the poultry industry than all other poultry regulations combined, and yet it is the subject of intermittent criticism and remains a target at which even poultrymen take occasional pot-shots. One correspondent recently complained that eggs should be sold by weight. The egg grading regulations provide for that adequately, since the weight of the egg is one important factor determining in what grade it shall go. Fortunately for the poultry industry weight is not the only item of consideration. In the long run quality is of more importance. One might find a stolen nest under the driveway in which all the eggs would weigh 24 ounces to the dozen or more, and they would be valueless except as missiles at a hot political meeting.

Fundamentally the egg grading law is sound and right. We do not say the regulations are perfectly written or enforced 100 per cent. No man-made law is perfect. Even the ten commandments, which are universally accepted as sound and just legislation, are not observed as they should be. Human nature is still too frail to conform strictly to any law, be it human or divine.

The egg grading regulations were revised recently. W. A. Brown, of the Livestock Branch, who administers them, says they will be revised again in due time. They are not like the laws of the Medes and the Persians which never change. If any of the regulations are found to be inimical to the poultry industry then a complaint backed by a majority of poultry keepers should be lodged at once. And when any representative body of poultrymen have a grievance to present they are assured a sympathetic hearing.—Farmer's Advocate.

More Valuable Crop

Better Prices For Grain Help To Offset Decreased Yield

The Sanford Evans statistical service estimates the value of the 1934 wheat crop of 268,000,000 bushels, based on prices paid at country points in the first six weeks of the current season, at \$178,935,000. This is about \$51,000,000 more than was netted for the crop of 268,000,000 raised in 1933.

Aside from wheat, the grain grower this year has had good prices for oats and barley. Any grower who had the good fortune to raise six-rowed malting barley got as much, and sometimes more, for it than the price of top grade wheat. Two or three years ago it was so unprofitable to market barley farmers used it for fuel.

A Big Order

"Do you make life-size enlargements from snapshots?" asked the girl. "Certainly, miss," answered the photographer. "That's our specialty." "Well," said the girl, "let's see what you can do with this picture of the Grand Canyon."

There are 244,333 possible bridge hands for every possible poker hand.

HERE'S THE "MUG"

This turkey-necked cup is the prize of victory in the international yacht races for America's cup, in which the British boat, "Endeavour", and the American craft, "Rainbow", competed of Newport, R.I. Sir Thomas Lipton, who tried many times to win this coveted trophy, referred to it as "that old mug".

Wood For Heating Purposes

In spite of the preference for coal and other fuels for heating purposes, a large amount of wood is still so used. The quantity used in normal years is estimated by the Forest Service, Department of the Interior, at 913 million cubic feet, or 9,611,223 cords. Fuel-wood formed about 30 per cent of the total amount of wood cut in the Dominion for all purposes. During the past two or three years there has been a large increase in the amount of wood used for fuel.

Watching The Rails

Writer Tells Of Peaceful Day During Train Journey

The following by Sisley Huddleston appeared recently in the Christian Science Monitor: "The observation car was empty save for myself and the conductor on a beautiful sunny Sunday afternoon. The radio was singing hymns that I had known since my boyhood. They touched tender memories. I sat watching the rails as we steadily pursued our way. On either side was cultivated land and here and there little woods. There were few towns along this route.

"Through the whole of that sunny afternoon the radio sang hymns and the steel rails, ruled straight across the country, ran closer together mile after mile, until somewhere on the horizon, an incalculable distance away, they met. "I have spent many peaceful days in a life that has been full of movement, but I can think of no more peaceful day than that which I spent, virtually alone in the observation car, as I was carried to my destination, listening to the radio singing hymns, and watching the endless flow of the steel rails, drawing nearer and nearer to each other, across the flat country, and disappearing on the horizon."

Reindeer Fall From Glacier

More Than 500 Lost Footing And Were Killed

The faraway town of Narvik, Norway, in the mountains will provide a Christmas eve gift for hundreds of fathers and mothers obliged by circumstances to explain that Santa Claus won't come this year.

More than 500 reindeer which plunged from a slippery glacier into an abyss are dead. Some were killed outright. Others clung for a time to rough places on the inclined surface of the glacier, but all lost their footing and fell into the chasm.

Either was not put to any practical use until 1842, although discovered in the 16th century.

Early-Ripening Wheats

Several New Hybrids Of Promise Have Been Developed

Producing an early-ripening, high-yielding, and high quality variety of wheat for those areas requiring wheats which mature relatively early is the problem in the work of the Cereal Division of the Dominion Experimental Farms next in importance to the developing of a rust resistant wheat of high quality and good yielding ability. While the varieties Garnet and Reward, which were introduced by the Cereal Division in 1926 and 1928 respectively, have undoubtedly contributed immensely to the success of large numbers of farmers who reside in areas subject to late summer frosts, these varieties have their defects.

Reward, for instance, lacks inherent yielding ability and resistance to smut, but in other respects, especially as regards quality, is an outstanding variety. Garnet, on the other hand, possesses the ability to produce high yields and resist the ravages of smut to a great degree but it is not as satisfactory as it might be on all markets in respect to quality. Attempts to combine the desirable features of the above varieties by crossing have been receiving much attention in recent years, with the result that several new hybrids of promise have been developed and only await the necessary evaluation.

Bulb Planters Seek Workers

Men With Large Feet Wanted To Tread Soil

Here's good news for medium-sized men with big feet who like the feel of wooden clogs.

Soon they will be in demand among the bulb planters of South Holland (Lincolnshire), who are beating the Dutchmen at their own game.

And here is what they will be paid to do. They will rise early in the morning, put on their big wooden clogs and plod out to a field where lilies have been planted in a shallow sandy bed.

They will then walk casually up and down the lily bed, treading not too lightly and not too heavily, and will go on walking like that until they have covered all the beds.

It is quite an important job, too, because it is yet another step in the advancement of the bulb-growing trade in the British Isles.

Accomplished Unusual Feat

Taking a photograph of Mount Rainier in Washington, 100 miles away, was the unique feat accomplished by R. J. Jamieson, automobile dealer at Victoria, B.C., who takes pictures as a hobby. Jamieson made an excellent infra-red photo of the mountain from the uplands of this city at twilight by using a telephoto lens.

Professor (after lecture): "Any questions?" Student: "Yes, sir. How do you calculate the horse-power in a donkey engine?"

Humming birds, swifts, swallows and martins cannot walk or hop on a horizontal surface.

No man is interested in another man's troubles—unless he is a lawyer.

Unemployment Insurance

Dual Plan Suggested By Retired British Banker

Adoption by Canada of an unemployment insurance plan which would have two separate funds, one suggested at Ottawa by E. R. Long, former manager of the Westminster Bank Limited, Aldwych, England. This would provide the good features of the revised system in England, the retired British banker considered.

A contractual fund could be set up for those now employed to be built up by contributions of the employer, worker, and the state, budgeted according to anticipated unemployment, he considered.

The unemployed could come under a transitional fund which would be a state obligation entirely, expenditures fluctuating according to necessity and being taken from taxation, said Mr. Long.

In other words, he stated, the Canadian system of direct relief would continue as "transitional insurance" and those now employed could be insured against future unemployment upon a contributory basis.

Locating Old Forts

Find Ruins Of Ash House Built In 1786

A search for the site of Ash House, a fort built in 1786 by the Northwest Fur Trading Company, commenced about 25 years ago by S. H. Forrest, K.C., was completed when the buried ruins of the trading post were discovered a few miles north of Lander, Man. E. G. Hetherington, G. A. McMoran, H. Forrest, of Souris, and Geo. Landreth, of Lander, accompanied Mr. Forrest.

Mr. Justice Montague, of Winnipeg, and Miss Landreth visited the site of another old fort on the northwest quarter of the same section, 31-5-24. Messrs. Forrest and Hetherington had before that located the site of Fort Grant about two miles west of Hartney. The sites were hidden by earth, ashes, prairie grass and trees, only protruding bones and the excavations for cellars marking the spots. In the process of searching, several oak pickets, remains of the stockade, were discovered at various points.

Dr. D. A. Stewart, of Ninette, Manitoba, and past president of the Manitoba Historical Society, with Col. Dave Wright, of St. John, N.B., have been interested in the search with Mr. Forrest and have co-operated in obtaining information regarding the probable location of these old forts.

Big Irrigation Project

Plan To Divert Waters Of South Saskatchewan River

A. W. Ellison, Fawcett, consulting engineer, A. E. Martin and W. B. Benn, Moose Jaw, will press an application for rights on the South Saskatchewan river from the provincial government. The application has already been filed with the government, but no action has yet been taken.

The rights sought are permission to erect a dam at Riverhurst, with a concrete highway on top and an irrigation project. The cost in the neighborhood of \$15,000,000, whereby it is hoped to make a garden spot of the south Saskatchewan valley. Sufficient power would be developed to take care of the irrigation project, and a domestic water supply for Moose Jaw and Regina and intervening points would be provided.

The proposal the sponsors say, will require 65 per cent. of the \$15,000,000 for labor and it will provide for industrial development in central Saskatchewan.

Two New Cattle Foods

Process Announced At Baltimore By Chemical Engineer

Two new cattle foods, one looking like a plug of tobacco, the other like Boston brown bread, both offering aid for stock feeding in drought, have been announced.

The plug is made of molasses and cottonseed meal; the Boston brown bread of molasses and corn meal. Both use a new scientific principle for mixing molasses, which has been for many years a cattle-feeding food, but difficult to handle because of its stickiness.

The new process was announced by Guy Leonard, a chemical engineer. He is well known among chemists as the man sent to Baltimore from England in the Great War to assist in developing an acetone process for use in making cordite.

The 1933 lumber production of the United States has been estimated at 13,328,000,000 feet.

FANCIFUL FABLES

THE TENDERFOOT

By GEORGE B. RODNEY

Author of "The Coronado Trail", "The Canyon Trail", Etc.

SYNOPSIS

"You've fallen heir to a half-share in plenty of trouble," the lawyer told Gerard Keene. "The Broken Spur has been systematically looting the ranch, and old Joe Carr, your partner, is drinking himself into ruin."

But Keene decided to go see what was happening for himself—not as the Hour-Glass Ranch, but as Duro Stone, tenderfoot in a Montgomery Ward wild-west outfit.

(Now Go On With The Story)

CHAPTER II.—Continued

"Listen to old Dad, will you," he growled. "His talk is rose potent."

Fragments of that talk came to them on the hot wind from the desert. Under that word-lash the burros frankly trotted. Dustin hailed him from cupped hands:

"Ho! Shammy-skin! . . . Dad! . . . Keene! . . . Come on over to the house!"

Kane stared at them from rheumy eyes white with crusted alkali and came slowly across to them, wiping his lips on the back of a dirty, hairy hand.

"Wait till I strip the packs. Them assen'll sure roll on 'em if I wait."

He followed the patient burros to the corral where they surged at the full water-trough and his voice shrilled in profane appeals.

"Hi, you Baptist! C'm to hell with that! . . . A chunk of rock as big as an orange smelt the reluctant Baptist behind the ear and brought him to order. "Presbyterian! Where the hell d'ye think you're goin'?"

In five minutes he had his packs stripped and lined up and came up the steps wiping his face on his sleeve.

"Them damn asses," he growled, "are more trouble 'n thoroughbreds. I got to chunk 'em with rocks on the trail to get two miles a day outen 'em. In camp, the minute I take off the packs they wander off. They'll stray twenty miles by sun-up. I been prospectin' out here more'n thirty years," he complained. "An' I swear to God more'n nineteen years was spent trackin' loose burros. What you want with me?"

"Come inside," said Dustin. "Nice names you got for 'em."

"Oh. You mean them asses. They've earned 'em. Now you take that ass Baptist. He'll run belly-deep into the just puddle he finds an' all hell can't git him out! Presbyterian! pick the roughest trail he kin find and shoulder the other asses into it. No matter where it takes 'em to as long as they take his trail. . . ."

He stopped talking as Dustin came back with a bottle and glasses and his shrewd eyes watched the ranchman pouring. Kane was a "desert rat" but he was no fool. He was fairly sure that Sam Dustin was never civil without just cause. He drained the tumbler at a gulp.

"You'll be damned glad you had the guts to grubstake me this time, Dustin," he said. "I got news for you."

It was the first time in his life that he had ever called Dustin by his last name without any prefix and both partners sensed that it had its meaning. They both eyed Kane. Could the old fool be drunk on just one hastily swallowed drink? It was not likely. They could not know that the old prospector, who had spent a lifetime trailing will-o'-the-wisps across a continent, was intoxicated with the headiest wine in the world. . . . Success! He thrust a gaunt old hand into his tattered shirt and fumbled there.

"Scratchin' yourself or what?" asked Goddard.

"Mostly 'what,'" said Kane grimly. "You two listen to me. . . . His voice rose shrilly as men do who would force belief."

"For more'n a lifetime I been trackin' an' trailin' across them ranges. . . . His knotted finger shot out toward the distant ranges of the West. . . . "I've done scratched grass from Alaska to Tehuantepec. There ain't a county between hell an' high water where I ain't sweated 'n' bled. I've eat more desert dust 'n the Lord used in creatin' man. . . ."

"Come to the point," said Dustin shortly. "Spike here says I've been a fool ever to have grub-staked you. What's bittin' you? What've you got this time? Need more of a grubstake to tide you over till the Christmas time?"

"Will you stand another stake if I need it?" demanded Kane. He felt he knew both men and he knew well that his few finds had not paid his grubstake bills. He did not really like a single horse in Sam Dustin's big body but after all. . . . Dustin

HOLDS FALSE TEETH TIGHT AS CEMENT

Plates can't possibly slip when you sprinkle on Dr. Wernat's Powder. Largest seller in world—holds plate so tight they can't annoy you so comfortable they actually feel and set like your own. Keeps mouth sanitary, breath pleasant—special comfort-suction prevents sensitive gums from getting sore. Small cost—any drugstore.

had staked him when no one else would.

"You mean you'll stand another stake if I need it?" he asked.

Both men eyed him. Old Kane might have concealed bad luck. He did it frequently. Good luck never! He must have some good news.

"Sure we'll stake you again," said Dustin quickly. "A man can't expect to win always. You've made one or two nice hauls, Dad. Better luck next time."

Dad Kane, desert rat, luckless prospector till now, gray and very wise Ulysses in Frontier lore, was taken in. He thought they meant it. These were partners worth having! How he had misjudged them! His eyes bored into Dustin's.

"I been seven days gittin' back," he said. "I was up in the Bent Wood hills. . . ."

Dustin's eyes contracted a little, possibly from the glare.

"We're partners in all my prospectin'," said Kane sharply. "But, by God! I'm not sharin' in what I seen your men doin' up there."

"What in hell do you mean, you damned old. . . ." began Dustin. But Spike Goddard waded him into silence.

"Wait a bit. . . . Spike's eyes narrowed and his voice softened. "Go on Kane. What do you mean?"

"Mean? You know damned well what I mean. I ain't no cattle man but I know what it means when I find two Broken Spur men changin' brands on Hour-glass cattle. Usin' runnin'-irons on cattle on a fenced range at that. After that, they cut the fences an' piled tumble-weed along the wire to look like an old break an' . . ."

"You're crazy, man! . . . I tell you. . . ."

"I ain't aimin' to start no trouble. Least of all do I want to have trouble with the Hour-glass people. I got me a good reason, too. You and me are partners in prospectin' but I tell you plain that if your men ain't called off old man Joe Carr's cattle, I'll not only split with you. . . . I'll go to him an' . . ."

"I tell you, you old fool, you're wrong," began Dustin. Then Kane exploded.

"I tell you I seen 'em," he said. "It wasn't no, small party just maverickin' a few calves like they've got a right to do. I seen Gray an' Eyes and Cured. They had a wagon in the hollow an' they had a fire goin' an' a nigger heatin' the irons. They might know that usin' fence-wood for the fire'd be like shoutin' out what they was doin'."

On legitimate business they'd have had dry wood in the cooney under the wagon. You call off your dogs till I git done with my business with the Hour-glass. If you don't, you'll be sorry. I ain't goin' to be misjudged in no cattle war all my time o' life."

A breathless silence held both partners. For just a fraction of a second Spike Goddard's eyes held his partner's gaze. Then he winked. Dustin at once took the cue. He was mentally quicker than Spike.

"Damn those fools," he said quickly. "If they've been up to any game like that, we'll sure fire 'em. I gave 'em the wagon and a few days off to hunt in the hills. God knows we don't need Hour-glass cattle."

"You don't need 'em now," said Kane curtly. "For more'n three years I've heard men say that if the Broken Spur had on most hides was cut down I'd strip to a Hour-glass. They change awful easy. You all don't need to do that from now on I tell you. Look here. . . ."

His outflung hand threw a skin bag to the table where it hit the board with a dull metallic clink.

Rheumatism

Is caused by failure of kidneys to remove uric acid poisons from the blood. Gin Pills relieve by neutralizing this acid and restoring the kidneys to normal action. See a box at all drugstores.

Dustin pounced on it like a cat on a mouse and fairly snatched it open with teeth and fingers as Kane talked.

"It'll need a couple o' men to help me for a few days but I'm thinkin' that when word gets out of what I've found, there'll sure be a stampede like the Tonopah days. In the meantime I need powder an' fuses an' dynamite an' drills. Mine are all worn down to the roots so to speak. I need a new pick and some beddin', too. Them damned asses o' mine eat up most of my bedding. I'll need two quartas of mercury, too, an' a new chimney bag an' two hundred o' bacon an' flour an' sugar an' coffee. . . ."

He ramblod on but neither man paid any heed. Dustin laid an old newspaper on the table and emptied the contents of the bag on it, and Goddard, who leaned over Dustin's shoulder, started back with a quick oath. Dustin, too, took fire at what he saw.

"Good God!" he said sharply. It was not an oath though Dustin was prone to use them. It was a combination of oath and diabolical and surprise.

"Where on earth did you find this, Dad?" he asked sharply. "I've seen gold from Alaska to Arizona but never anything like this. Where on earth did you find it?"

"Like it?" Kane giggled the senile laugh of old age. "I didn't find it on earth at all. I found it under the earth and I dare like a damned fool of a prairie dog to git it. I figured that bag'd make you both set up. This is what I git for keepin' on tryin' after you all figured I was an other damned old desert rat gone crazy."

He thrust a claw-like hand deep into the little heap of sand and fragments and turned it over lovingly. Little yellow nuggets lay on top nesting in rich portions of lighter gravel. One great piece of white quartz was laced and streaked with gold as red as fire and one chunk, almost as big as a man's closed fist, seemed made of solid metal.

"Looks like I've found the Mother Lode," cackled Kane. "What say?"

(To Be Continued)

Little Helps For This Week

"Whether therefore ye eat or drink, or whatsoever ye do, do all to the glory of God." 1 Corinthians 10:31.

"With good will doing service as to the Lord and unto men." Ephesians 6:7.

A servant, with this clause, Makes drudgery divine; Who sweeps a room, as for Thy sake, Makes that and the action fine. —G. Herbert.

Surely the truth must be that whatever in our daily life is lawful and right for us to be engaged in, is in itself a part of our obedience to God, a part that is of our very religion. Whenever we hear people complaining of obstructions and hindrances put by the duties of life in the way of devoting themselves to God, we may be sure they are under some false view or other. They do not look on their daily work as the task God has set them, and as obedience to Him. We may go farther and say not only that the duties of life, be they never so toilsome and distracting, are no obstruction to a life of any degree of inward holiness, but that they are even direct means. When rightly used, to promote our sanctification.—H. E. Manning.

THE RHYMING OPTIMIST

By Aline Michaels

THE SAINT

His tattered hat, his ragged coat; What to the saint do these denote? The lanky roof above his head, His scanty share of milk and bread, His low estate, unknown, unprized, To give him pain were these devised? The saint goes by and never knows How through his coat the chill wind blows.

Though men may smile and men may sneer, He dwells in Heaven now and here!

More than 11,000 Jewish refugees fled from their homes in Germany to Palestine in the nine months following April 1, 1933.

It has been estimated that the temperature of the centre of the sun is not more than 150,000,000 degrees Fahrenheit.

In proportion to their sizes, a fly walks about 85 times as fast as a man.

The American school savings bank system now operates in 15,000 schools.

LESS THAN 1¢ WORTH IN A CAKE

IT actually takes less than 1¢ worth of Magic Baking Powder to make a cake, and you can count on good results—every time! No wonder Canada's cookery experts say it doesn't pay to take chances with inferior baking powder. Bake with Magic and be sure!

"CONTAINS NO ALUM." This statement on every tin is your guarantee that Magic Baking Powder is free from alum or any harmful ingredient.

MAGIC BAKING POWDER

MADE IN CANADA

Alberta Pool

Makes Third Annual Payment On 1929 Guarantee

The Alberta treasury is \$453,425 richer, representing the third annual payment from the Alberta Wheat Pool on its 1929 crop overpayment guarantee.

The payment was made from central headquarters at Calgary and announced by R. D. Purdy, manager.

The guarantee on the 1929 was in excess of \$5,000,000, it was reported when the agreement was reached between the government and the pool.

Delivers Bread By Boat

W. Selmin, the "Bread Boatman", has just completed his 45th year delivering bread on the Lower Clarence river at Maclean, New South Wales.

In travelling his daily round he has covered between 600,000 and 700,000 miles—without an accident. Most of his rounds were done in a rowing boat, but the last few years he has used a motor boat.

Smarter Tie For Sailors

New Pattern Being Issued For British Jack Tar

The black silk handkerchief, or scarf, for many generations a distinguishing feature of the British sailors' uniform, is to be oblong instead of square, state admiralty fleet orders.

Since the latter part of the eighteenth century, the scarf, always 36 inches square, has been tied with a knot to meet the point of the sailor's collar. The new size will be 36 inches by 38½ inches.

A naval officer said that, after a little wear, the square handkerchief when formed into a tie or scarf, is not long enough to make a neat knot. Issues of the new pattern will begin at once.

Upward of 12,000,000 in Great Britain are insured against unemployment, and 17,000,000 against sickness, maternity, invalidism, and old age.

Here's Way Science Now Relieves Pain in Minutes

BAD HEADACHES, NEURITIS AND RHEUMATIC PAINS EASED ALMOST AT ONCE

Remember the pictures below when you want fast relief from pain. Aspirin eases even a bad headache or neuritis often in a few minutes! An Aspirin tablet begins "taking hold" of your pain practically as soon as you swallow it. And Aspirin is safe. For Aspirin does not harm the heart.

Remember these two points: Aspirin Speed and Aspirin Safety. And, see that you get ASPIRIN, the method doctors prescribe. It is made in Canada, and all druggists have it. Look for the name Bayer in the form of a cross on every Aspirin tablet. Get tin of 12 tablets or economical bottle of 24 or 100 tablets.

Why Aspirin Works So Fast

When in Pain Remember These Pictures

—ASPIRIN DOES NOT HARM THE HEART—

Keep "Leftovers" Fresh and Tasty

You know how deliciously fresh waxed paper keeps sandwiches. "Para-Sani" Heavy Waxed Paper will do the same for cut meats, cake and other foods that remain at the end of the meal. "Para-Sani" enables you to serve these left-overs again, knowing that they still possess their appetizing flavor and freshness.

"Para-Sani" comes in a handy roll. Just tear off what you need against the sharp edge of the box. For less exciting uses "Centre-Full" Waxed Paper in sheets is very popular.

Your druggist or stationer has them both.

I LOATHED SCRUBBING TOILET BOWLS UNTIL I USED GILLET'S LYE

It flushes off stains without harming enamel or plumbing...

HOW to get rid of those ugly toilet-bowl stains! It's easy—with Gillett's Pure Flank Lye. Once a week pour this powerful cleanser and disinfectant—full strength—down toilet bowls and drains. It flushes off stains without scrubbing. Cannot harm enamel or plumbing. Kills germs and destroys all odors as it cleans!

There's no need to slave over unpleasant cleaning jobs. Let Gillett's Lye work for you—it's quick, thorough and absolutely dependable. Ask your grocer for a tin—today.

Never dissolve lye in hot water. The action of the lye itself heats the water.

FREE BOOKLET—Send for new revised edition of the Gillett's Lye Booklet. Gives full directions for cleaning sink drains and toilet bowls, tells how to shorten dozens of other cleaning tasks. Also contains full directions for soap making, thorough cleaning, and other uses on the farm. Write to Standard Brands Limited, Fraser Avenue and Liberty Street, Toronto, Ontario.

GILLET'S LYE EATS DIRT

Praises Canada

Mr William Clark, High Commissioner, Returns to England

Sir William Clark, high commissioner for the United Kingdom at Ottawa for many years, returned to England, referring in glowing terms to his experiences in Canada.

Sir William is taking the British high commissionership in the Union of South Africa after six years in Canada. He declared that all his work there had been "immensely helped by the kindness and generosity" of the prime ministers during his term of office. W. L. Mackenzie King and Prime Minister R. B. Bennett.

The World Series

The world series is the all-important event these days and with the series now tied with a game apiece, the following selections by local fans will tell you just how to bet your money.

Everett Bills: "Detroit has the better balanced team and will win the series."

Hughie (R.B.) McIntyre: "The Dean boys will win the series for St. Louis."

Doug. Hall: Detroit will win the series, although I expect it to go seven games.

Dad Hall: St. Louis will win the series just as sure as you're a foot high.

Glen Williams: I look for St. Louis to win and the series to go six or seven games.

Adam Cruickshank: St. Louis will win the series.

Lloyd McRory: I am pulling for St. Louis to win.

Ed. Meyers: The Cardinals look like a good bet to me.

Milt McCool: It will be the best series in years and I believe St. Louis will win.

J. H. Reeves: The Tigers will win. Archie McFadyen: Detroit has this series in the bag right now—sure, sure.

Constance Cameron: Dizzy Dean will give St. Louis the edge.

Ira Heywood: There is no stopping the Cardinals.

Lloyd Havens: I look for Detroit to be the new world's champions.

C. H. McMillan: I favor Detroit to win.

G. Y. McLean: St. Louis will win the series.

George Lim: The National League is playing better ball than the American League and the Tigers will find that out.

Frank Ruddy: Detroit will win the series hands down.

Honest John: I think New York will win, it is a big town.

Ivor Lewis: The Cardinals are good enough for my money.

Fred Patchell: St. Louis has the edge in pitching and should win.

Dr. Williams: I believe Cochrane has the better all round team and certainly the younger club of the two, I will be disappointed if Detroit does not win.

Jim Cumming: Rowe will be the hero of this series.

George Huser: The Dean boys and Collins will win the series for St. Louis.

Holders of Victory Loan 5½% Bonds due 1st November, 1934, after detaching and retaining the coupon due 1st November next, may, for the period during which the subscription lists are open, tender their bonds in lieu of cash on subscriptions for a like par value of bonds in one or more maturities of the new issue and receive allotment in full with prompt delivery. The surrender value of the Victory 5½% Bonds will be as follows:

100% of their par value on subscriptions for the Two-year 2% Bonds and the Five-year 2½% Bonds.

100% of their par value on subscriptions for the Eight-year 3% Bonds if effected on or before 6th October, and 100% of their par value after that date.

100% of their par value on subscriptions for the Fifteen-year 3½% Bonds if effected on or before 6th October, and 100% of their par value after that date.

Holders will receive in cash the difference between the surrender value of their Victory Bonds and the cost of the bonds of the new issue.

The amount of this Loan is limited to \$250,000,000.

The Loan is authorized under Act of the Parliament of Canada, and both principal and interest are a charge on the Consolidated Revenue Fund of Canada.

The proceeds of this Loan will retire \$222,216,850 Dominion of Canada 5½% Bonds maturing 1st November, 1934. The balance will be used for the general purposes of the Government, including the redemption of short-term Treasury Bills.

Subscriptions will be received and receipts issued by any branch in Canada of any Chartered Bank and by Recognized Dealers, from whom may be obtained application forms and copies of the official prospectus containing complete details of the Loan. Applications will not be valid in form other than those printed by the King's Printer.

The subscription lists will open 1st October, 1934, and will close on or before 13th October, 1934, with or without notice, at the discretion of the Minister of Finance.

DEPARTMENT OF FINANCE,
OTTAWA, 1ST OCTOBER, 1934.
